

## Special Session call for papers

---

# Modeling, monitoring and mitigation of ageing in industrial systems

Organized and co-chaired by  
**Nicolas Patin**, [nicolas.patin@utc.fr](mailto:nicolas.patin@utc.fr)  
**Paolo Mattavelli**, [paolo.mattavelli@unipd.it](mailto:paolo.mattavelli@unipd.it)

### Scope and objectives

This special session will deal with the problem of the ageing of the active and passive components encountered in industrial systems but also in transports applications

It covers not only various components:

- transistors,
- capacitors,
- batteries,
- etc...

but also different objectives such as:

- physical analysis of ageing (e.g. mechanical, electrical, chemical, thermal aspects),
- diagnostic methodology,
- real time implementation of control laws acting on the longevity of equipment.

### Paper submission

Instructions for full paper submission are available at the conference website  
<http://www.electrimacs2014.upv.es/>
